

# Recovery Time

- Lengthy recovery time:
  - > Causes user inconvenience
  - > Costs staff time
  - > Is primary reason for disabling energy saving features
- Draft specification calls for recovery time of 10 - 20 seconds (emphasis on 10 seconds)

# Recovery Time

- Many low-speed copiers have near instant recovery
- Recovery time remains a challenge for higher speed copiers
- Research indicates that several manufacturers could achieve faster recovery in the medium-speed range
  - > Surface fusing
  - > Direct heating roller
